CLEAN WINDOWS, MIRRORS, AND OTHER GLASS —for a clean house

PA-742

Division of Home Economics—Federal Extension Service
U. S. Department of Agriculture—June 1966

TO CLEAN GLASS

Collect All Tools and Supplies Needed

- Clean cloths for washing, drying, and shining
- Newspaper or paper towels
- Vinegar, ammonia, soap or detergent
- Bucket of warm water
- Whiskbroom or a brush
- A stepladder, step-stool, or sturdy chair (a stepladder is safer)

Get Ready for the Job

Mix $\frac{1}{2}$ cup vinegar or $\frac{1}{3}$ cup ammonia in 1 gallon of water. (You may use some soap or detergent instead of vinegar or ammonia.)

Put some paper on a chair. Set the bucket of water on the paper. Put it near the glass you will clean.

TO DO THE JOB

- Brush window frames and sills to remove loose dirt.
- Wash top window panes first, with wet cloth.
- Wash each pane from top to bottom.
- Rub dry with dry cloth or paper.
- Wipe and dry windowsills. You may want to wax the sills.

Clean mirrors and the glass over pictures the same way you do window glass.
